

Company Profile

Oil & Gas Procurement, Supply & Technical Support Services

Neon & Baker Solutions

April 2026

Neon & Baker Solutions Limited

Neon & Baker Solutions Limited is a 100% Nigerian-owned, oil and gas services company incorporated on September 9, 2021, under the Companies and Allied Matters Act 2020.

We deliver asset-critical procurement, supply and operational support services to upstream and midstream operators and EPC contractors across Nigeria. Our core offer covers valves and flow control equipment, MRO materials, personal safety equipment, and technical procurement support.

Our operations are governed by an ISO 9001:2015 certified quality management system, and we are fully registered with all relevant Nigerian regulatory bodies.

VISION

To be a globally respected oil and gas services company recognised for operational excellence, disciplined project execution, and solutions that enable safe, reliable and sustainable energy operations.

MISSION

To deliver dependable, high-quality procurement and supply services that enhance asset performance, strengthen supply chain confidence, and support our clients' operational objectives while building local capacity.

- Expediting and inspection coordination

03

Emergency & Critical Spares

- Emergency spares sourcing with expedited lead times
- Lead-time optimisation and vendor coordination
- Unplanned maintenance supply support
- Fast in-country mobilisation from Lagos base
- Supply chain reliability for asset-critical items

04

PPE & Safety Equipment Supply

- Coveralls and protective work clothing
- Safety helmets, goggles and hearing protection
- Protective gloves and footwear
- General work clothing and uniforms
- Full PPE range compliant with international standards

Technical Consultancy

Engineering and procurement advisory for operators and EPC contractors, covering vendor selection, technical evaluation, and material specification alignment.

Heavy Duty Equipment Supply

Sourcing and supply of heavy-duty equipment for upstream and midstream operations, with support for importation, customs clearance, and in-country delivery.

Installation & Maintenance Support

Coordination of installation and maintenance activities for supplied equipment including valves, actuators, and MRO items, with field support during planned shutdowns and turnarounds.

Local Content & Compliance

Support for Nigerian Content compliance positioning, NOGIC JQS alignment, and NCDMB regulatory requirements in line with the NOGICD Act.

Asset & Field Support

Field operations coordination and asset readiness support, covering delivery logistics and on-site coordination for critical materials and equipment.

Procurement Services

End-to-end procurement support covering vendor qualification, purchase order management, expediting, documentation, and goods receipt coordination.

IN PROGRESS

NIPEX

Nigerian Petroleum Exchange

Vendor registration on the NIPEX platform is currently being completed to strengthen compliance positioning for Nigerian upstream and midstream procurement engagement.

IN PROGRESS

01

Fully Compliant

ISO 9001:2015 certified. NOGIC JQS registered. NUPRC licensed. NCDMB registered. All credentials are in place to operate across Nigerian oil and gas with full regulatory standing.

02

Focused Scope

Our scope covers valves, MRO, PPE, and procurement support. This focused approach means faster response, fewer errors, and consistent quality of delivery.

03

Quality Controlled

All supply activity is governed by our ISO 9001:2015 certified quality management system. We apply a structured vendor qualification process and manage traceability documentation.

04

Local with International Reach

Lagos-based for fast in-country mobilisation with access to international sourcing networks. We bridge both sides of the supply chain.

05

Emergency Ready

We support unplanned maintenance requirements with expedited sourcing and delivery coordination. When an asset goes down, speed and reliability are non-negotiable.

06

Structured from Day One

Our processes and quality management systems are built to international standards. We operate with documented discipline and accountability, not improvisation.
